The image shows an outdoor industrial or construction yard. A long, dark, curved metal beam, possibly a part of a crane or a large structural component, lies on the ground. In the background, there are stacks of similar metal beams, a green tarp covering some equipment, and a building with a corrugated metal roof. The ground is dirt and littered with some trash.

The image shows two large, curved, rusted metal beams lying on a dirt ground. The beams are made of a heavy-duty material, possibly steel, and have a distinct C-channel or I-beam cross-section. They are heavily corroded, with a thick layer of reddish-brown rust covering most of their surfaces. The beams are curved in a similar fashion, with one being slightly more pronounced than the other. They are positioned parallel to each other, with the one on the left being slightly closer to the viewer. The ground is a mix of dry, light-brown soil and darker, damp patches. There are some small pieces of debris and a few circular metal discs scattered around the beams. In the background, there are some more rusted metal structures, possibly parts of a larger machine or a pile of scrap. The overall scene suggests a construction or industrial site where these beams are being prepared or stored.

Devdharay industries

A photograph showing a large stack of curved, rusted metal beams, likely steel channels, arranged in a neat pile. The beams are dark and show significant rust. They are stacked in a way that shows their hollow, C-shaped cross-section. The background is an industrial yard with a concrete wall, some debris, and a green pipe lying on the ground in the foreground. The text "Devdharay industries" is overlaid in orange.
